CAREER OBJECTIVE

Motivated third-year Computer Science engineering student with a hands-on approach to real-world problem-solving. Passionate about applying classroom knowledge to create meaningful digital experiences. Seeking an internship to expand understanding of software development and contribute to impactful projects.

TECHNICAL SKILLS

Languages: Python, C, Java, JS, TS, PHP, HTML, CSS

AI / ML: TensorFlow, Scikit-learn, Pandas, NumPy, CNNs, NLP, LLMs

Frameworks: React, Next.js, Tailwind, Streamlit, FastAPI

Databases: MySQL, PostgreSQL, Oracle, Supabase

Tools: Git, GitHub, Vercel, VS Code, UI/UX

EDUCATION

BMS College of Engineering, *BE in Computer Science and Engineering | CGPA: 8.99 | Graduation : 2027*
09/2023 – Present | Bangalore

Delhi Public School, Bangalore, *12th CBSE (Mathematics, Physics, Chemistry) | CBSE: 93%*
07/2021 – 03/2023 | Bangalore

Greenwood High International School, Bangalore,
10th ICSE | ICSE: 96.4%
07/2020 – 03/2021 | Bangalore

LANGUAGES

English: *Fluent*
French : *Conversational*
Telugu : *Native*

PROJECTS

Agentic AI App Builder, *LangChain, LLM, Python, Pydantic, PyCharm*
Built an agentic AI system that autonomously plans, designs, and generates full-stack web applications using LangChain and LLMs.Designed a multi-agent pipeline with stage-wise validation to improve output reliability and enforce structured, error-free execution.

BeaTIFY (Music platform),
React, Tailwind CSS , Supabase, PostgreSQL, HTML5 Audio API
Built a full-stack music streaming platform with React and Supabase, enabling real-time audio playback, authentication, and playlist management. Delivered a responsive, production-ready app with Tailwind CSS and Vercel deployment, ensuring fast performance and seamless cross-device experience.

Hire Flow (Full-Stack Job Platform), *React JS, Redux Toolkit, Rest API, Mango DB, JWT*
Developed a full-stack job portal with role-based access (Admin/User), enabling job creation, search/filter, and application workflows using React Router and Redux Toolkit. Built secure JWT authentication and REST APIs with Express.

SmartServe System, *HTML5, CSS3, Java Script, PHP , MySQL , Git, GitHub*
Developed a real-time order management system with dynamic tracking, admin controls, and secure payment integration. Enhanced user experience with intuitive menu management and order history features, backed by a robust PHP-MySQL architecture.

ACHEIVEMENTS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

Oracle AI Vector Search Certified Professional

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate

IBM Agentic AI Workshop & Hackathon – Participant

Generative AI Certified | AI/ML, NLP, LLMs, Prompt Engineering

Represented college football team; 2× Inter-college Tournament Winner (2025)

AREAS OF INTEREST

- Machine Learning
- NLP & Computer Vision
- Full-Stack Development
- Deep Learning
- Generative AI & LLMs
- AI for Social Good

EXTRA CURRICULAR ACTIVITIES

Football (College Team), Competitive Coding, Hackathons, Open-Source Exploration, Marathon Running
